DETAILED ACTION

Election/Restrictions

1. Applicant's election of Species II (claims 2-7) in the reply filed on 4/22/08 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. **Claims 2-7** are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 2-7 are drawn to functional descriptive material NOT claimed as residing on a computer readable medium. MPEP

2106.IV.B.1(a) (Functional Descriptive Material) states:

"Data structures not claimed as embodied in a computer-readable medium are descriptive material per se and are not statutory because they are not capable of causing functional change in the computer."

"Such claimed data structures do not define any structural or functional interrelationships between the data structure and other claimed aspects of the invention which permit the data structure's functionality to be realized."

Also, refer to page 53 of the Interim Guideline.

Claims 2-7, while defining a computer program product, do not define a "computer-readable medium" and is thus non-statutory for that reason. A computer program product can range from paper on which the program is written, to a program

simply contemplated and memorized by a person. The examiner suggests amending the claim to state, "A computer-readable medium encoded with a computer program..." in order to make the claim statutory.
